# IMPORTANT INFORMATION

## PLEASE READ

**What size bin do I require?** Our 2 & 3 cubic metre hard-fill bins are purpose built to take clean hard-fill such as soil, concrete, bricks, stone, tiles, clay, gravel, rocks, sand, and tar seal. These smaller bins are also ideal for those weekend clean-ups jobs.

For those larger waste disposal jobs we offer 4,5,6,9 and 10 cubic metre bins. As a quick measurement a cubic metre is roughly the amount that would be carried by a small trailer. If you are unsure as to the size of the bin you require please give us a call to discuss your waste disposal requirements and we will be only too happy to provide you with a solution that meets your needs.

**How high can I fill the bin?** New Zealand land & Transport and OSH Regulations require that bins are not to be filled past the top rim. Please ensure to comply with this requirement, as for health and safety reasons our drivers are not able to collect bins that are loaded over height or insecurely loaded.

**What width of drive do I require in order for trucks to access my property?** Our trucks are light and maneuverable and will access most driveways. We need a minimum width of 2.8 metres. If you are unsure of your access situation give us a call and we will be only too happy to visit your site or property and provide free advice.

**How long can I have the bin?** Our standard term of hire is 5 days, however please let us know if you would like to arrange a bin for more than 7 days and more.

**What is not allowed to be placed in the bin?** We are unable to accept any form of hazardous waste, for example chemicals, waste oil, paint, tires, fibrolite (asbestos), bulk food waste or bulk glass. We also do not accept large tree stumps. If you have a bin for green waste no flax or palm type material can be included. If you have any doubts as to the suitability of your waste please give us a call to discuss your options, 0800 022 409 Tauranga.

Any mix material falls under general waste, please try to keep concrete and other materials separate if possible.

If bin is over fill and we have to make a second trip an extra \$80 will be added to amount plus an \$10 a day fee for bin.

If invoice is not been paid for any reason there will be a weekly charge of \$200 a week, please make contact with office if there is any reason the invoice cant be paid.

Extra cost that can be added to bin cost.

# Rhino Waste Bag

*Terms and conditions*

## **RHINO WASTE BAG**

### **OVER FILL ( RUBBISH FALL OUT OF BAG BECAUSE OF OVER FILL**

#### **GENERAL WASTE )**

If driver comes to site and material is not to height level and rubbish is falling out of bag, driver will either ask if you would like another bag for free or take rubbish off bag and leave on site.

if another bag is provided and we can load both skips on the spot ,there will be an extra \$50 charge for drivers time.If we have to come back and pick up the bin that was provided extra the cost will be \$90.Fill up to 500 from the top down

#### **CONCRETE. SOIL. WET GIB, METAL.**

Please fill bag just under half way,that is why we provide an extra bin for free, if not comply with the height level that we provide under the terms and conditions there will be an extra charge of \$90 per bag ( for the risk of transporting the bag over filled and risk of concrete cutting through bag and Tonnage is max to 3 tons per truck, if you fill a 4,5m<sup>3</sup> bag will concrete to the top you will be over the weight limit and will be penalize \$90 per bag.The bag can hold up to 2.5 tons but we would like to be on the safe side while transporting the bags.

Please let us work together to be safe and affordable.

# Full height

## General Waste

Fill 500mm from the top down,  
if you pull the handle down  
that will give you a  
safe indication,

## Concrete, soil, wet Gibbing, bricks

fill just under half way of bag!  
That is why we give an extra  
bag for free! 1 bag will be 2m<sup>3</sup>  
if bag is fill just under half way.  
2 bags will be 4 m<sup>3</sup> in total.  
No reason to over fill, just ask  
for more please

## Grass, trees, timber garden waste

Fill 500mm from the top down,  
if you pull the handle down  
that will give you a  
safe indication,
