over-weight charged at \$16/100kg

LANDFILL

2 meter skip	3000 kg
3 meter skip	3000 kg

over-weight charged at \$8/100kg

How high can I fill the bin?

New Zealand land & Transport and OSH Regulations require that bins are not to be filled past the top rim. Please ensure to comply with this requirement, as for health and safety reasons our drivers are not able to collect bins that are loaded over height or insecurely loaded.

How long can I have the bin?

Our standard term of hire is 5 days, however please let us know if you would like to arrange a bin for 7 days and more.

What is not allowed to be placed in the bin?

We are unable to accept any form of hazardous waste, for example chemicals, waste oil, paint, tires, fibrolite (asbestos), bulk food waste or bulk glass. We also do not accept large tree stumps. If you have a bin for green waste no flax or palm type material can be included. If you have any doubts as to the suitability of your waste please give us a call to discuss your options, 0800 022 409.

Any mix material falls under general waste, please try to keep concrete and other materials separate if possible.

If the bin is over fill and we have to make a second trip an extra \$80 will be added to amount plus a \$10 per day fee for the bin.

If invoice has not been paid for any reason a weekly charge of 10% a month will apply (unless other prior arrangements are made), please make contact with office if there is any reason the invoice cant be paid.

Extra cost that can be added to bin cost:

Weight that exceeds the allowance.

Contents that are being dump.
